

John R. Teeple

Senior Vice President Agriculture DTN

John currently serves as Senior Vice President of Agriculture at DTN, a global data analytics and insights company based in Burnsville, MN and Omaha, NE. In this role John is responsible for DTN's global agricultural solutions and services, The Progressive Farmer magazine and related digital media.

Prior to joining DTN, John spent 23 years with John Deere progressing through several leadership positions in the Agricultural Equipment Division, John Deere Power Systems and World Headquarters. His most recent assignment was Director of Technology with the John Deere Intelligent Solutions Group in Urbandale, IA where he was responsible for advanced research and development, President of Navcom Technologies (a John Deere subsidiary in Torrance, CA), and lead Blue River Technology in Sunnyvale, CA and John Deere Labs in San Francisco, CA. He previously served as the Director of Corporate Strategy where he facilitated the development and evolution of the John Deere Strategy and served as a core team member on major M&A activities. In prior roles, John served as the Factory Manager of the Des Moines Works in Ankeny, IA where he managed the transformation of the culture and operations, Manager, Global Tractor Programs where he was responsible for new tractor product development programs and Manager, Corporate Strategy where he developed new growth strategies and supported business development initiatives. John also held several operations positions at the Waterloo Works including Business Unit Manager and Manager, Production Control.

In addition to John Deere, John has previous experience working for other Iowa manufacturers including Rockwell International, Amana Refrigeration and American Tool & Engineering. He also served as a Consulting Services Manager for Parametric Technology Corporation a product lifecycle management software company based in Waltham, MA.

John holds a B.S. degree in Industrial Technology from Iowa State University and an Executive M.B.A. from the Kellogg Graduate School of Management at Northwestern University.
